

### Location

Everett, WA

### Owner

Premier Storage LLC  
Kirkland WA

### Project Description

Locally owned Premier Storage is a new, fully heated, 100,000 sf self-storage facility built for the winters that the Pacific Northwest is known for. The conveniently placed storage facility consists of 2 multi-story buildings which use load bearing light gage steel stud framing with steel decking and poured in place concrete floors. The buildings utilized structural steel framing members which were used to meet span requirements over loading areas. The project was completed on schedule in the fall of 2013.
